

Emergency Notification System

ARGYLE, TX, January 19th, 2017 – In an effort to improve communications with the public and businesses the Argyle Fire District has switched from Code Red Notification and contracted with Everbridge Inc., to provide mass notification services for urgent and emergency needs.

Effective immediately it will be necessary for individuals who live in Argyle, Bartonville, Copper Canyon, Corral City, Lantana and Northlake wishing to receive alerts to sign up under the new provider by visiting www.argylefire.com and clicking on the “Sign Up Today” link under the Everbridge section

This new service should continue to provide the timely notifications via: Phone, Text, E-Mail, and TTY services. It is also possible to input multiple addresses and devices under a single account to provide warnings that are geographically important. The new Everbridge system will continue to provide subscription based weather notifications sent automatically from the National Weather Service and will be distributed based on geographical relevance.

Any data entered into Code Red will not be imported into the new Everbridge system. All data in the old system is scheduled to be removed from the servers.

The Argyle Fire District strives to provide only emergency notifications or messages that require an urgent action to be taken. We will never send general announcements, political messages, or advertisements to you. In addition, the Argyle Fire District and Everbridge will never sell your information or perform telemarketing activities.

If you do not have access to a computer, many public libraries have computers and staff that may help you with navigating to the registration website. You may also call the Argyle Fire District Administration office at 940-464-7102 for assistance in registering.

For any questions or assistance you may also email emergencymanagement@argylefire.com
